Skovby Møbelfabrik A/S

- by most people known as Skovby - is a family-owned joint-stock company founded in 1933. The company has developed into one of the leading manufacturers of complete dining room furniture in Denmark.

The most advanced technology ensures a constant production and the necessary capacity to execute orders. But the classical craftsman traditions have not been forgotten. On the contrary, they are still the basis of every single piece of furniture made by Skovby- and the consumers' guarantee that they get the best of Danish furniture tradition and design. This is what distinguishes our products from many other products. Throughout the years, Skovby dining room furniture has become worldwide known. Because of the beautiful design, the classic lines and the perfect quality. Skovby furniture is today exported to more than 20 countries.

Wooden furniture

Wood has been used for production of furniture all over the world through centuries. This is above all due to the fact that wood is aesthetically appealing because of the beautiful and individual structure nature has created, which i.e. contributes to making your Skovby furniture unique. Therefore minor differences in colour or structure are not considered as being an error. It should be pointed out that wooden furniture (solid and veneered) might change colour and character because of the influence of light and air. This may result in the solid tabletops becoming warped and a little marked.

Solid soap or oil treated furniture must be treated before use in order to quickly obtain a surface that rejects dirt and moisture. When the furniture has been put into service it should be treated 2-3 times a year or when necessary.

General remarks

- A. Moisture is furniture's worst enemy. Any spilt liquid should be wiped up immediately
- B. The surface of sideboard and tabletops must be protected from heat as well as from wet and coloured objects. Protect the surface when you use sharp tools (knives etc.)
- C. The furniture is intended only for indoor use and should always be placed in rooms with normal temperature and humidity (16-30 deg. C and 40-70% R.H.)
- D. Do not place the furniture directly against heaters or radiators
